

CATWAY France

EXCLUSIVE IMPORTER FOR EUROPE CATEYE ROAD Japan

SOLAR ROAD MARKERS

Road marker " MITY 2 TD-LE-02 " is fitted with 2 or 4 leds and 2 acrylic catadioptrés. Designed to upgrade road safety in dangerous areas in night or twilight darkness or whenever visibility is bad (fog, rain, etc.). Many amenities use to be set up in order to fight driving over the speed limit and to upgrade safety: roundabouts, safewall barriers, curves, twists and turns, heightened passageways, frontparts of traffic islands, calming ramps,... These amenities, if improperly indicated or lit up, are dangerous for drivers and enhance accident risks in low visibility situation. The road marker provides an alternative to public lighting, the setting up and maintenance of which are costly. It allows for alert of a driver that there is an obstacle at a more than 300 m ahead.

MITY 2 TD-LE-02

Cost saving
Ecological
Maintenance free
Easy to affix, stuck
Without trenches
Without borings

MITY 2 Marker is triggered as soon as light intensity is below 200 Lux.

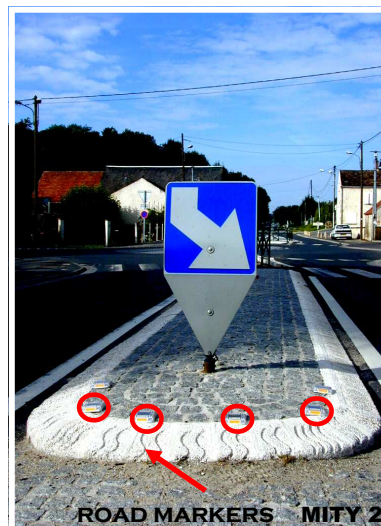

Available in the following options

Monodirectional 2 leds (standard colours): W2 white, A2 yellow,
R2 red, B2 blue, G2 green

Bidirectional 4 Leds : W white

SPECIFICATIONS (Dynamic lighting TD-LE-02-W2)

Solar cell : Silicium Mono-Cristalline
Batteries : 2 pcs. / Ni-Mh (métal hydrure)
LEDs : 2 pcs. de Ø 5 mm / blanc (ultra high brightness) / 1.560 mcd effective
Catadioptrés : 2 pcs. (Pattern RR-W1) / White / Acrylic
Lighting time: 15 msec / Frequency : 3 Hz
Twilight Triggering Point : ±200 Lux
Temperature for use : -20°C ~ +70°C
Average timelife of batteries : ±5 years
Average timelife of Leds : 100.000 hours ±10 years
Size : Width 102 mm / Lenght 82 mm / Thickness 20 mm / Weight 170 g
Waterproof body : Polycarbonate and translucide resin (equivalent IP 67)
Functionning time : 18 hours / wintertime night / Europe
Glue : 'SIKADUR 31' Glue
(epoxyd thixotrop glue with 2 solvent free compounds) <http://www.sika.fr>
